Work Experience

Android Developer Intern (Neox) — [Certificate]

Doodlebook Pvt. Ltd. (Frontend: Java; Backend: Node.js + MySQL)

02/2022 – 09/2022, Delhi

- Solely built the Android frontend (Java) for the Neox social media platform end-to-end, owning UI design through API integration.
- Implemented TikTok-style short-form and YouTube-style long-form video playback, tuning ExoPlayer buffering and rendering for smooth performance on low-end devices.

Android Developer — [Certificate]

Acme Academy (Frontend: Kotlin/KMP; Backend: ExpressJs + MongoDB)

May–Jun 2024, May–Jun 2025

- Led development of a NIMCET Rank Predictor in Kotlin Multiplatform (KMP), later extended to multiple MCA entrance exams; reached **2,000 combined users** within the first two days of each result cycle.
- Built a responsive Jetpack Compose UI shared across Android, Desktop, and iOS, delivering consistent cross-platform performance analytics.

Skills

- **Android/Mobile:** Kotlin, Jetpack Compose, Kotlin Multiplatform (KMP), MVVM, ExoPlayer, Room
- **Languages:** Kotlin, Java, C++, Python
- **Backend:** Spring Boot, REST APIs, MongoDB, MySQL, SQLite
- **Other:** Git, TensorFlow Lite, DASH/HLS Streaming, Clean Architecture

Recent Projects

EchoStrike (Hack36, National Hackathon, 4th Prize, 2025)

Tech Stack: Kotlin, MVVM, Python, TensorFlow Lite, Gyroscope/Accelerometer

- Built a real-time 2-player LAN audio tennis game for visually impaired players in a 36-hour hackathon using stereo sound cues for directional gameplay.
- Trained a TensorFlow Lite model on 250 recorded swings per direction to classify motion in real time, powering the gameplay that won **4th place nationally**.

Iris – Image Recognition and Indexing Service (Personal Project, 2026)

Tech Stack: Kotlin, Jetpack Compose, FastAPI, Celery, Redis, PostgreSQL, pgvector, YOLOv8, CLIP, EasyOCR, Backblaze B2

- Built an Android application using Kotlin and Jetpack Compose for semantic image and video search, powered by CLIP embeddings and PostgreSQL + pgvector.
- Developed a FastAPI backend with Celery + Redis for asynchronous media processing, integrating YOLOv8, EasyOCR, and Backblaze B2 for object detection, OCR, and media storage.

MWI - Media Without Internet (Personal Project, 2025)

Tech Stack: Kotlin, Spring Boot, DASH/HLS, SQLite

- Architected a full-stack local streaming platform on Spring Boot, serving video over campus LAN at resolutions up to **4K** with no internet dependency.
- Implemented chunked uploads for files up to **10GB** and adaptive bitrate streaming via both DASH and HLS for smooth playback across network conditions.

Education

Master of Computer Applications (CPI: 7.13)

08/2024 – Present

Motilal Nehru National Institute of Technology Allahabad

Bachelor of Computer Applications (77.67%)

2020 – 2023

St. Thomas College, Bhilai

Achievements

- **Winner – DevJam 2025, Sign it or Miss it:** Secured **1st place** out of **78 competing teams** with a real-time 3D hand-tracking Unity game.
- **NIMCET 2024:** Achieved an **All India Rank of 190** out of nearly 25,000 students.
- **Finalist – CodeSangam 2024, Dhwanii:** Special mention for the JavaFX media player.
